

The kennel of French bulldogs "Justymon" is located in the valley of the Jeseníky Mountains. We have experience with breeding German Shepherds, followed by a long break and after meeting the French Bulldogs, we decided to buy our first bulldog girl Arabella. This breed soon won the heart of our whole family, not only in appearance, but above all in its amazing character. He is really a dog who will do everything with you and is an amazing partner in all respects. Our bulldogs share a house with us with a large garden in the countryside. We currently have 6 bulldogs-5 girls and 1 boy in our kennel. Our bulldogs come from well-known kennels from Russia, France, Serbia, Poland and of course also from the Czech Republic. We build our breeding on quality bloodlines of this breed and the most important thing for us is the health of our dogs. All bulldogs from our kennel have health tests and examinations of the patella (patella - part of the bone in the knee joint), heart, degenerative myopathy, cystinuria, HC and the color tests.

French Bulldog kennel JUSTYMON

BEAUTY- HEALTH - FUNCTION - LIFE

Welcome to JUSTYMON, a French Bulldog breeding kennel founded out on our love for this extraordinary breed and our belief that beauty and health can go hand in hand. We live together with our frenchies in the beautiful mountain surroundings of the Jeseníky Mountains in the Czech Republic, where our dogs have plenty of space for exercises, nature and fresh mountain air. (follow our facebook profile Jaroslava Blahuš or our instagram).

Our frenchies share our entire life with us. They swim in the rivers, travel with us to the seaside, go on holidays, enjoy the mountains and even accompany us on ski trips. They are not simply breeding or showdogs - they are first and foremost our family companions.

HEALTH FIRST, DNA testing and BOAS

The health of our dogs is our highest priority. For this reason, our dogs undergo health examination well beyond the mandatory requirements of the Czech breed club.

Our health screenings include heart examinations, patella examinations, CAMBRIDGE BOAS testing and X-Ray of the hips, elbows and knees. Our stud dogs also undergo spine X-rays. All our dogs have laboklin packets including genetic tests panels like DM, Cystinuria, HSF4, CMR, CHG, CDDA/CDDY etc.

Our dogs undergo also Cambridge BOAS testing, some of them directly in UK, in Birmingham, after the Crufts.

Dwina, Athena and Freya Justymon achieved BOAS Grade O in UK, Dwina twice 2024 and 2025.

At present, we are the only french bulldog kennel in the Czech Republic, who has taken BOAS testing directly in Birmingham at Cruft's.

CAREFULLY PLANNED BREEDING

Every our litter is planned in advance. We cooperate with selected breeding kennels around the world and work with high quality bloodlines, including

A'vigdors, Daulokkes's, De La Parure, Frustyle, Dicar, Kingfriend, Robobull etc. Our goal is combine, health, beauty, functionality and characteristic temperament of the French Bulldog.

LIFE IN THE JESENÍKY MOUNTAINS

Our french bulldog are an integral part of our family and live an active life with us. They spend time in nature, swim, travel and experience different environments. We believe that this allows us to see them not only as beautiful representatives of the breed, but above all as healthy, active dogs capable of enjoying a full life.

We want our dogs to be able to do what dogs are meant to do-move, explore, play, travel and enjoy life alongside their families.

OUR PUPPIES AROUND THE WORLD

JUSTYMON offspring live not only in the Czech Republic, but also around the world. Our puppies have found the loving homes in the USA, France, Belgium, Netherlands, Austria, Philippines, Poland, Slovakia and represent successfully Justymon at national, international, European, World dogshows and Cruft's.

Most importantly, however, we want every puppy we breed to find a loving family and a wonderful home, where it will first and foremost be a happy and cherished member of the family.

OUR VISION

We believe, that the French Bulldog can be healthy, beautiful, vital and active.

Every Justymon litter is the result of long-term planning, careful selection of parents, extensive health testing and work quality bloodlines.

We want to breed French Bulldogs who can walk in the mountains, swim in the rivers or seas, travel with their families, enjoy nature and holidays, and above all - live a full and happy life.

Because the true beauty is not only what we see. True beauty is a healthy dog that is happy to live.
